MPCI Claim Notice of Prevented Planting, or Damage or Loss

INSURED INFORMATION				AGENT / AGENCY INFORMATION			
JULINGTON CREEK FARMS PO BOX 600277 JACKSONVILLE, FL 32260-0000				PROGRESSIVE AG Agent Code: PH Agent was notified of claim via: Phone			
PHONE: (608)339-9869				PHONE: (701)277-9210		CODE: 7772-30	
PLEASE SPECIFY THE CROP FOR WHICH YOU ARE FILING A LOSS. (One crop per notice.) : POTATOES(84) - APH(90)							
Specify below all county locations that have experienced damage.							
County	Unit No.	Legal Description	Cause of Loss			Date of Loss	Intentions*
FLAGLER (35)	UNKNOWN	UNKNOWN	Cold Wet Weather			04/2018	OT

*Intentions Legend: To harvest = HT; To chop/silage = CS; Leave for cover = LC; Destroy = DS; Plant to another crop = PC; Pasture = PS; Hay = HY; Crop will be direct marketed = DM; Other (please explain) = OT; Replant = RP; Unknown at this time (Substantive) = UK

Indicate the condition of the damaged crop acreage for which you are claiming a loss by marking the box at left and answering the questions for that section.

☐ **PREVENTED PLANTING**

(Unable to plant all or part of the insured crop acreage by the final planting date or within the late planting period for the crop.)

☐ **REPLANT TO SAME CROP**

(Replanting previously planted crop acreage to the same crop due to damage or conditions preventing an adequate stand.)

1. Are at least 20 acres or 20% of the acres in each of the reported unit(s) being replanted?

☐ YES

☐ NO

2. Are more than 50 acres being replanted within any unit being reported?

☐ YES

☐ NO

****You must obtain company approval before destroying or replanting any of the crop acreage you intend on replanting!****

☐ **NOTICE of DAMAGE**

(Crop has sustained damage, however all acres will be taken to harvest - it appears production will exceed guarantee at this time.)

**** A claim will be filed for the crop(s) reported. The company will take no further action at this time. Please notify your agent if loss becomes apparent or if crop sustains additional damage.**

☐ **HARVESTABLE**

(Part or all of crop acreage being reported has significant damage, however all crop acres will be harvested.)

(Harvest means: Harvesting in a manner consistent for the insured crop being reported, ie. corn insured as grain, harvested for grain.)

1. What is the approximate date of harvest for the crop(s), you are reporting a loss? _____

2. Will any harvested production from the reported acreage be farm stored or used in another method other than storing or selling?

☐ YES

☐ NO

3. Will all harvested production from the reported acreage be delivered or sold to an elevator, processor, or third party?

☐ YES

☐ NO

4. Will the estimated amount of your loss exceed \$5000 for any individual crop unit for which you are reporting a claim?

☐ YES

☐ NO

****Your policy requires that you keep a complete record of harvesting and marketing records of each insured crop for each unit.****

☒ **SEVERELY DAMAGED**

(Part or all of the crop acreage has sustained severe damage - Intend to destroy, hay, graze, chop for silage or abandon ANY acres of the crop within the unit(s) being reported.)

****You must have company approval before destroying any crop acreage of the unit(s) reported for loss****

****Your policy requires that you continue to provide ordinary care to your crop(s) after reporting a claim.***

Other policies? If the interest share for any of the crop units reported for loss are less than 100%, is the other share insured? ☐ YES ☒ NO

Please list associated policies.

DATE

Your policy requires that you report any probable loss in writing within 72 hours of your initial discovery of damage (but not later than 15 days after the end of the insurance period) by unit, for each insured crop, unless stated otherwise in the specific crop provisions. If during harvest a probable loss is suspected, you must notify the Company promptly, and give dates when harvest will be completed. Representative unharvested sample areas of the crop must be left, as specified by the Crop Provisions, so the adjuster may verify the cause and extent of damage. The size and number of sample areas may vary by crop and acreage but should be for most crops: (a) a strip at least ten feet wide extending the entire length of each field in the unit(s) or (b) as specified by the specific crop provisions for the crop. The sample areas must not be harvested or destroyed until the time specified in the applicable crop provisions. Should you wish to work the harvested acreage, some crop's provisions require that representative sample areas of the stubble be left in tact. Make sure sample areas are representative of the entire field.

Loss Credit Agreement

In addition to any premium and/or administrative fees for all crop(s)/county(ies) in which the billing date has passed and for the crop/county(ies) with the loss, I agree to have my total premium and/or administrative fees for all of my crop(s)/county(ies) insured under this policy or any other policy authorized under the ACT deducted from the indemnity or prevented planted loss due me under this claim. If the billing date has passed for any crop(s)/county(ies) at the time the loss payment is processed, any amounts due for those crop(s)/county(ies) will be deducted, regardless of how you answered this question.

Yes ☒ No ☐Summary Questions

Is any acreage of the damage crops considered a second crop following a first insured crop which was planted and incurred an indemnity within the same crop year?

no

Is any acreage of the damage crops considered a second crop following a first insured crop which was prevented from being planted within the same crop year?

no

Was any part of this crop loss due to chemical damage?

no

Verifications

I certify that to the best of my knowledge and belief all of the information on this form is correct and complete and that it will be used to determine my loss, if any, for damage to my insured crops. I understand that this Production Worksheet/Proof of Loss and supporting papers are subject to audit and approval by us. I understand that this crop insurance is subsidized and reinsured by the Federal Crop Insurance Corporation, an agency of the United States Department of Agriculture (USDA). I accept the Agreed Amount Payable, subject to policy provisions, for damage to my insured crops. I hereby certify that the acreage reports for each insured crop that I submitted are true and correct and that all documents or copies of documents that I have submitted in support of my insurance claim are true, correct and complete. I hereby authorize you to inspect any and all scale tickets, warehouse receipts, inventory records and any other documents that pertain to the crop I have harvested and marketed or that I now have in my possession wherever located. I also hereby expressly authorize you to inspect and copy any and all records of the Farm Service Agency of the USDA, consent to the release of the records that pertain to my farming operation, my production history, and my compliance with program requirements. I also understand that failure to report completely and accurately may result in sanctions under my policy, including but not limited to voidance of the policy, and in criminal or civil penalties (18 U.S.C. §1006 and §1014; 7 U.S.C. §1506; 31 U.S.C. §3729, §3730 and any other applicable federal statutes).															67. PLANTED FIRST INSURED CROP DECLARATION FORM

Insured Name JULINGTON CREEK FARMS					Policy Number MP-0749812			Company Name AGRI GENERAL INSURANC...		
Claim Number 18-004232				Crop Year 2018			County FLAGLER			
Unit Number (First Crop)	Line Number	Yield Number	Legal Description/FSN	First Insured Crop	Intended Second Crop	Option Number	Acres			
3.06 OU	6.0	10	310	PTATO (0084)	N/A	1 (NS)	102.0			

Enter the applicable option number(s) in the above table (First Crop Planted Acreage):

1. I certify that I will **not plant a second crop** on the same acreage where the first insured crop is planted. The first crop premium and indemnity will be reduced by 65% if a second crop is planted (by you or another person or entity), insured, and has a payable indemnity (handled in accordance with option number three below). You will also be responsible for notifying us of this change in your intentions and repaying any overpayment on the first insured crop. **(Code NS)**
2. I elect to **NOT insure** any acreage of a second crop planted on the same acreage as any planted first insured crop in the unit (decision applies to all second crop acreage on a first insured crop unit basis). **(Code WI)**
3. I certify that I will **insure** the acreage of a second crop planted on the same acreage as any planted first insured crop in accordance with my policy provisions (regardless of whether the acreage is insured with a different insurance provider or planted and insured by a different person or entity). I also agree to accept whatever option results in the greatest number of net dollars between the additional first crop indemnity (less additional first crop premium) and any potential second crop indemnity, UNLESS this amount is limited by the terms of the policy provisions. **(Code IR)**
4. I certify that I will insure the acreage of a second crop planted on the same acreage as any planted first insured crop in accordance with my policy provisions (regardless of whether the acreage is insured with a different insurance provider or planted and insured by a different person or entity). I have, and am submitting, acceptable records to show that I have **double cropped acreage in at least two of the last four crop years** in which the first insured crop was planted in the county or can show that the applicable acreage was double cropped in at least two of the last four crop years in which the first insured crop was grown on it. I also agree that if I have planted more double cropped acres than can be supported by my records, the extra acres will be handled in accordance with the applicable option number elected above for such acreage. **(Code DC)**
5. I certify that I will plant and insure a second crop on the same acreage where the first insured crop is planted. The first insured crop acreage in this situation does not contribute to the first insured crop unit loss which results in such acreage not being subject to an indemnity reduction. This code is used when no other multiple cropping code applies to such acreage and a 100% indemnity is applicable. **(Code FC)**

A second crop is defined as the next occurrence of planting any agricultural commodity for harvest following a first insured crop on the same acreage. A cover crop, planted after a first insured crop and planted for the purpose of haying grazing or otherwise harvesting in any manner, or that is hayed or grazed prior to November 1 of the current crop year, or otherwise harvested at any time, is considered a second crop. It is not considered a second crop if a volunteer crop or cover crop is not intended to be hayed, grazed or otherwise harvested (i.e. green manure, erosion control etc.), or is hayed or grazed on or after November 1 of the current crop year.

I certify that to the best of my knowledge and belief all of the information on this form is correct. I also understand that failure to report completely and accurately may result in sanctions under my policy, including but not limited to voidance of the policy, and in criminal or civil penalties (18 U.S.C. §1006 and §1014; 7 U.S.C. §1506; 31 U.S.C. §3729, §3730 and any other applicable federal statutes).

COLLECTION OF INFORMATION AND DATA (PRIVACY ACT) STATEMENT

Agents, Loss Adjusters and Policyholders

The following statements are made in accordance with the Privacy Act of 1974 (5 U.S.C. 552a): The Risk Management Agency (RMA) is authorized by the Federal Crop Insurance Act (7 U.S.C. 1501-1524) or other Acts, and the regulations promulgated thereunder, to solicit the information requested on documents established by RMA or by approved insurance providers (AIPs) that have been approved by the Federal Crop Insurance Corporation (FCIC) to deliver Federal crop insurance. The information is necessary for AIPs and RMA to operate the Federal crop insurance program, determine program eligibility, conduct statistical analysis, and ensure program integrity. Information provided herein may be furnished to other Federal, State, or local agencies, as required or permitted by law, law enforcement agencies, courts or adjudicative bodies, foreign agencies, magistrate, administrative tribunal, AIPs contractors and cooperators, Comprehensive Information Management System (CIMS), congressional offices, or entities under contract with RMA. For insurance agents, certain information may also be disclosed to the public to assist interested individuals in locating agents in a particular area. Disclosure of the information requested is voluntary. However, failure to correctly report the requested information may result in the rejection of this document by the AIP or RMA in accordance with the Standard Reinsurance Agreement between the AIP and FCIC, Federal regulations, or RMA-approved procedures and the denial of program eligibility or benefits derived therefrom. Also, failure to provide true and correct information may result in civil suit or criminal prosecution and the assessment of penalties or pursuit of other remedies.

NONDISCRIMINATION STATEMENT

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or a part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD).

To file a complaint of discrimination, write to: USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410, or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.

PHONE: (608)339-9869				PHONE: (701)277-9210		CODE: 7772-30	
PLEASE SPECIFY THE CROP FOR WHICH YOU ARE FILING A LOSS. (One crop per notice.) : POTATOES(84) - APH(90)							
Specify below all county locations that have experienced damage.							
County	Unit No.	Legal Description	Cause of Loss			Date of Loss	Intentions*
FLAGLER (35)	UNKNOWN	UNKNOWN	Excess Moisture/Precipitat...			02/2019	OT

*Intentions Legend: To harvest = HT; To chop/silage = CS; Leave for cover = LC; Destroy = DS; Plant to another crop = PC; Pasture = PS; Hay = HY; Crop will be direct marketed = DM; Other (please explain) = OT; Replant = RP; Unknown at this time (Substantive) = UK

Indicate the condition of the damaged crop acreage for which you are claiming a loss by marking the box at left and answering the questions for that section.

☒ **PREVENTED PLANTING**

(Unable to plant all or part of the insured crop acreage by the final planting date or within the late planting period for the crop.)

☐ **REPLANT TO SAME CROP**

(Replanting previously planted crop acreage to the same crop due to damage or conditions preventing an adequate stand.)

1. Are at least 20 acres or 20% of the acres in each of the reported unit(s) being replanted?

☐ YES

☐ NO

2. Are more than 50 acres being replanted within any unit being reported?

☐ YES

☐ NO

****You must obtain company approval before destroying or replanting any of the crop acreage you intend on replanting!****

☐ **NOTICE of DAMAGE**

(Crop has sustained damage, however all acres will be taken to harvest - it appears production will exceed guarantee at this time.)

**** A claim will be filed for the crop(s) reported. The company will take no further action at this time. Please notify your agent if loss becomes apparent or if crop sustains additional damage.**

☐ **HARVESTABLE**

(Part or all of crop acreage being reported has significant damage, however all crop acres will be harvested.)

(Harvest means: Harvesting in a manner consistent for the insured crop being reported, ie. corn insured as grain, harvested for grain.)

1. What is the approximate date of harvest for the crop(s), you are reporting a loss? _____

2. Will any harvested production from the reported acreage be farm stored or used in another method other than storing or selling?

☐ YES

☐ NO

3. Will all harvested production from the reported acreage be delivered or sold to an elevator, processor, or third party?

☐ YES

☐ NO

4. Will the estimated amount of your loss exceed \$5000 for any individual crop unit for which you are reporting a claim?

☐ YES

☐ NO

****Your policy requires that you keep a complete record of harvesting and marketing records of each insured crop for each unit.****

☐ **SEVERELY DAMAGED**

(Part or all of the crop acreage has sustained severe damage - Intend to destroy, hay, graze, chop for silage or abandon ANY acres of the crop within the unit(s) being reported.)

****You must have company approval before destroying any crop acreage of the unit(s) reported for loss****

****Your policy requires that you continue to provide ordinary care to your crop(s) after reporting a claim.***

Other policies? If the interest share for any of the crop units reported for loss are less than 100%, is the other share insured? ☐ YES ☒ NO

Please list associated policies.

DATE

Your policy requires that you report any probable loss in writing within 72 hours of your initial discovery of damage (but not later than 15 days after the end of the insurance period) by unit, for each insured crop, unless stated otherwise in the specific crop provisions. If during harvest a probable loss is suspected, you must notify the Company promptly, and give dates when harvest will be completed. Representative unharvested sample areas of the crop must be left, as specified by the Crop Provisions, so the adjuster may verify the cause and extent of damage. The size and number of sample areas may vary by crop and acreage but should be for most crops: (a) a strip at least ten feet wide extending the entire length of each field in the unit(s) or (b) as specified by the specific crop provisions for the crop. The sample areas must not be harvested or destroyed until the time specified in the applicable crop provisions. Should you wish to work the harvested acreage, some crop's provisions require that representative sample areas of the stubble be left in tact. Make sure sample areas are representative of the entire field.

CERTIFICATION: I certify to the best of my knowledge and belief that the acreage of crops/commodities and land uses listed herein are true and correct and that all required crops/commodities and land uses have been reported for the farm(s) as applicable. Absent any different or contrary prior subsequent certification filed by any producer for any crop for which NAP coverage has been purchased, I certify that the applicable crop, type, practice, and intended use is not planted if it is not included on the Report of Commodities for this crop year. The signing of this form gives FSA representatives authorization to enter and inspect crops/commodities and land uses on the above identified land. A signature date (the date the producer signs the FSA-578) will also be captured.

In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Persons with disabilities who require alternative means of communication for program information (e.g., Braille, large print, audiotape, American Sign Language, etc.) should contact the responsible Agency or USDA's TARGET Center at (202) 720-2600 (voice and TTY) or contact USDA through the Federal Relay Service at (800) 877-8339. Additionally, program information may be made available in languages other than English.

To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD-3027, found online at http://www.ascr.usda.gov/complaint_filing_cust.html and at any USDA office or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call (866) 632-9892. Submit your completed form or letter to USDA by: (1) mail: U.S. Department of Agriculture Office of the Assistant Secretary for Civil Rights 1400 Independence Avenue, SW Washington, D.C. 20250-9410; (2) fax: (202) 690-7442; or (3) email: program.intake@usda.gov. USDA is an equal opportunity provider, employer, and lender.

15 December 2018 - 25 February 2019

Location: **Flagler County, FL; T13S R29E Sec Sec 26; Lat: 29.3422, Lon: -81.3454**

Report prepared by PRISM Climate Group, Northwest Alliance for Computational Science and Engineering, Oregon State University, Corvallis, OR, 22 Mar 2019

This document provides an analysis of the precipitation and temperature conditions for a point in Flagler County, FL over the period from 15 December 2018 through 25 February 2019. The map indicates the location of the point within the surrounding region.

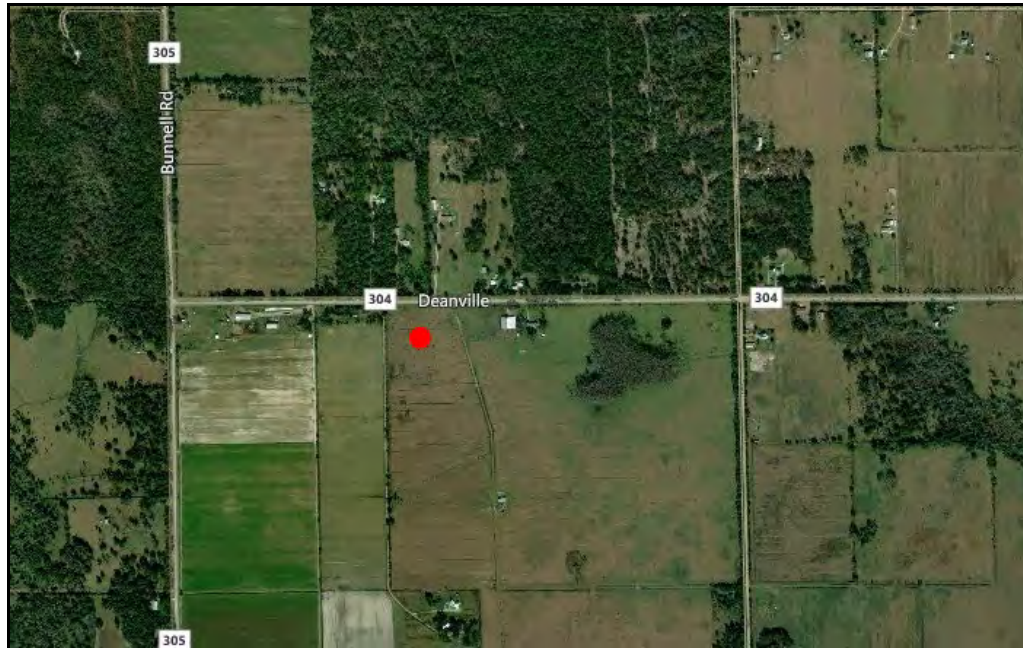

Figure 1. Location of the selected point (red dot).

Daily observations during the period of interest were compared to the same dates in the prior 10-year period (2008-2018). Figure 2 shows the assessment classifications for total precipitation and temperature. Figures 3 and 4 show the values recorded over the period, compared to the 10-year averages. Overall, in comparison with the 10-year period, precipitation conditions were determined to be wet

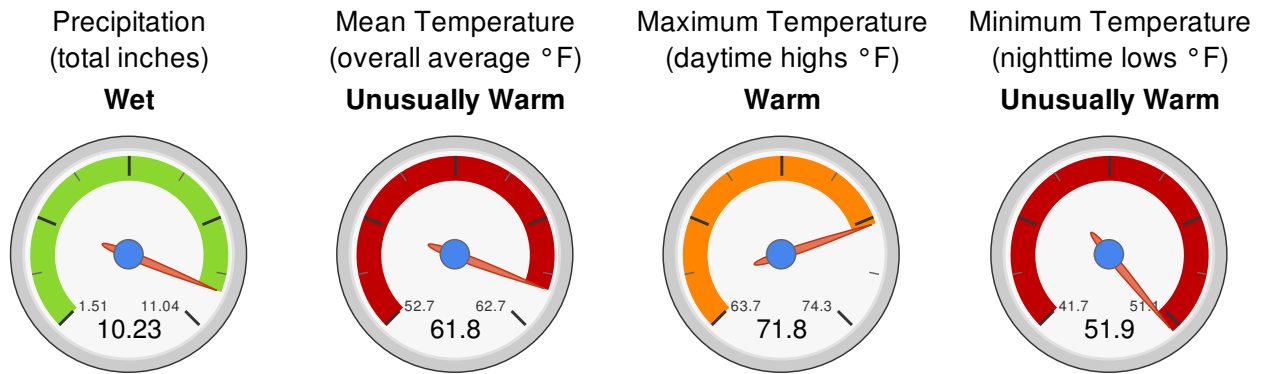

Figure 2. Relative assessment of conditions during the period, compared to the prior 10-year period.

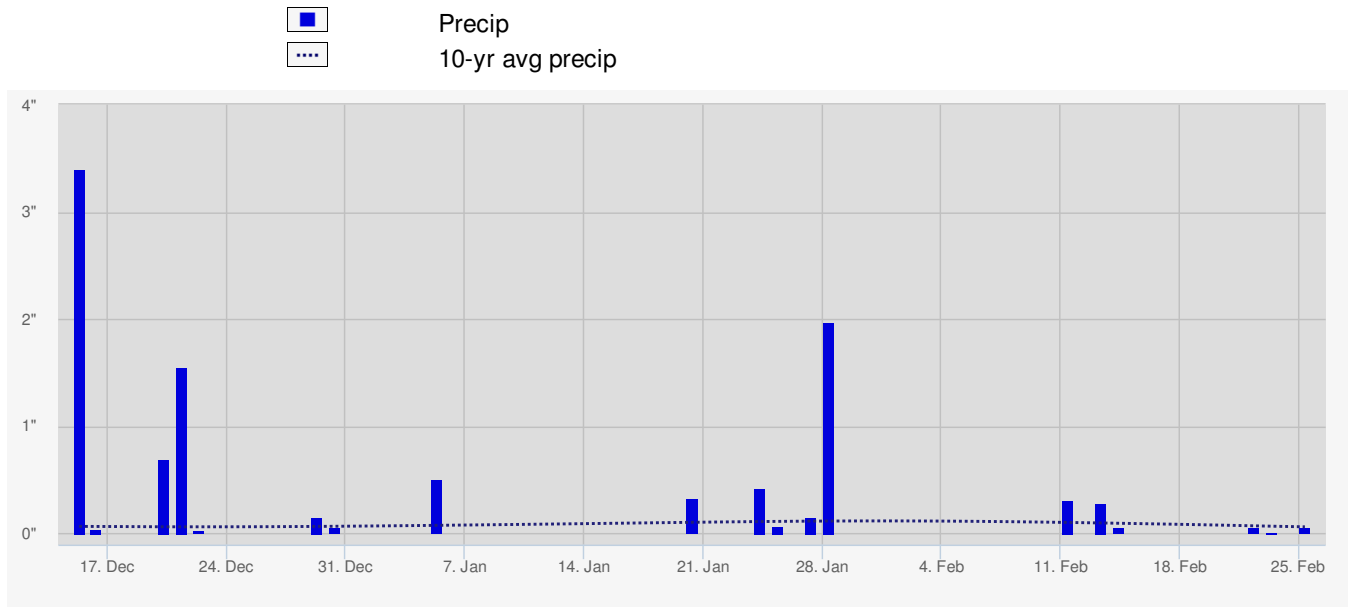

Figure 3. Total precipitation during the period, compared to calculated averages over the prior 10-year period.

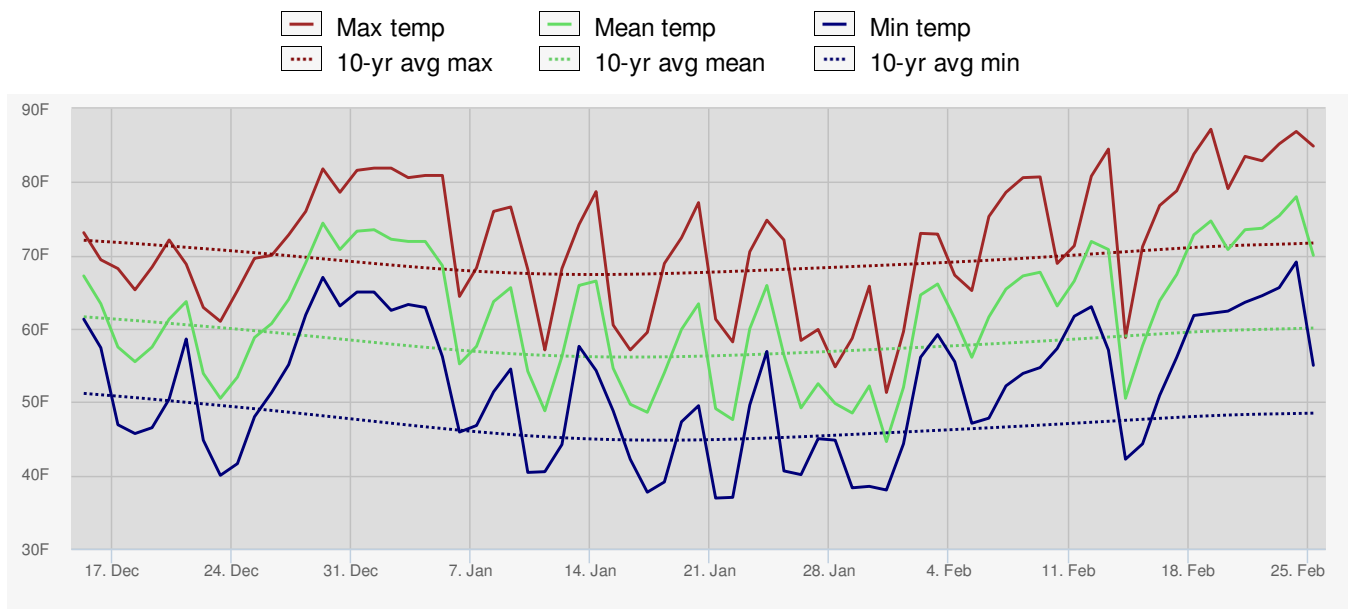

Figure 4. Temperatures during the period, compared to calculated averages over the prior 10-year period.

Note: Rather than calculating days based on the 24-hour period ending at midnight local time, PRISM defines a "day" as the 24 hours ending at 12:00 Greenwich Mean Time (GMT, or 7:00am Eastern Standard Time). This means that PRISM data for May 26, for example, actually refers to the 24 hours ending at 7:00am EST on May 26. (This is done so that days are consistent across the country, regardless of time zone or daylight savings time and because most of the weather observations on which PRISM depends are taken only once per day, early in the morning.)

Custom Soil Resource Report for **Flagler County, Florida**

**Julington Creek Farms FSN 389
Tract 426 #2 and 39**

Preface

Soil surveys contain information that affects land use planning in survey areas. They highlight soil limitations that affect various land uses and provide information about the properties of the soils in the survey areas. Soil surveys are designed for many different users, including farmers, ranchers, foresters, agronomists, urban planners, community officials, engineers, developers, builders, and home buyers. Also, conservationists, teachers, students, and specialists in recreation, waste disposal, and pollution control can use the surveys to help them understand, protect, or enhance the environment.

Various land use regulations of Federal, State, and local governments may impose special restrictions on land use or land treatment. Soil surveys identify soil properties that are used in making various land use or land treatment decisions. The information is intended to help the land users identify and reduce the effects of soil limitations on various land uses. The landowner or user is responsible for identifying and complying with existing laws and regulations.

Although soil survey information can be used for general farm, local, and wider area planning, onsite investigation is needed to supplement this information in some cases. Examples include soil quality assessments (<http://www.nrcs.usda.gov/wps/portal/nrcs/main/soils/health/>) and certain conservation and engineering applications. For more detailed information, contact your local USDA Service Center (<https://offices.sc.egov.usda.gov/locator/app?agency=nrcs>) or your NRCS State Soil Scientist (http://www.nrcs.usda.gov/wps/portal/nrcs/detail/soils/contactus/?cid=nrcs142p2_053951).

Great differences in soil properties can occur within short distances. Some soils are seasonally wet or subject to flooding. Some are too unstable to be used as a foundation for buildings or roads. Clayey or wet soils are poorly suited to use as septic tank absorption fields. A high water table makes a soil poorly suited to basements or underground installations.

The National Cooperative Soil Survey is a joint effort of the United States Department of Agriculture and other Federal agencies, State agencies including the Agricultural Experiment Stations, and local agencies. The Natural Resources Conservation Service (NRCS) has leadership for the Federal part of the National Cooperative Soil Survey.

Information about soils is updated periodically. Updated information is available through the NRCS Web Soil Survey, the site for official soil survey information.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or a part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require

alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410 or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.

How Soil Surveys Are Made

Soil surveys are made to provide information about the soils and miscellaneous areas in a specific area. They include a description of the soils and miscellaneous areas and their location on the landscape and tables that show soil properties and limitations affecting various uses. Soil scientists observed the steepness, length, and shape of the slopes; the general pattern of drainage; the kinds of crops and native plants; and the kinds of bedrock. They observed and described many soil profiles. A soil profile is the sequence of natural layers, or horizons, in a soil. The profile extends from the surface down into the unconsolidated material in which the soil formed or from the surface down to bedrock. The unconsolidated material is devoid of roots and other living organisms and has not been changed by other biological activity.

Currently, soils are mapped according to the boundaries of major land resource areas (MLRAs). MLRAs are geographically associated land resource units that share common characteristics related to physiography, geology, climate, water resources, soils, biological resources, and land uses (USDA, 2006). Soil survey areas typically consist of parts of one or more MLRA.

The soils and miscellaneous areas in a survey area occur in an orderly pattern that is related to the geology, landforms, relief, climate, and natural vegetation of the area. Each kind of soil and miscellaneous area is associated with a particular kind of landform or with a segment of the landform. By observing the soils and miscellaneous areas in the survey area and relating their position to specific segments of the landform, a soil scientist develops a concept, or model, of how they were formed. Thus, during mapping, this model enables the soil scientist to predict with a considerable degree of accuracy the kind of soil or miscellaneous area at a specific location on the landscape.

Commonly, individual soils on the landscape merge into one another as their characteristics gradually change. To construct an accurate soil map, however, soil scientists must determine the boundaries between the soils. They can observe only a limited number of soil profiles. Nevertheless, these observations, supplemented by an understanding of the soil-vegetation-landscape relationship, are sufficient to verify predictions of the kinds of soil in an area and to determine the boundaries.

Soil scientists recorded the characteristics of the soil profiles that they studied. They noted soil color, texture, size and shape of soil aggregates, kind and amount of rock fragments, distribution of plant roots, reaction, and other features that enable them to identify soils. After describing the soils in the survey area and determining their properties, the soil scientists assigned the soils to taxonomic classes (units). Taxonomic classes are concepts. Each taxonomic class has a set of soil characteristics with precisely defined limits. The classes are used as a basis for comparison to classify soils systematically. Soil taxonomy, the system of taxonomic classification used in the United States, is based mainly on the kind and character of soil properties and the arrangement of horizons within the profile. After the soil

Custom Soil Resource Report

scientists classified and named the soils in the survey area, they compared the individual soils with similar soils in the same taxonomic class in other areas so that they could confirm data and assemble additional data based on experience and research.

The objective of soil mapping is not to delineate pure map unit components; the objective is to separate the landscape into landforms or landform segments that have similar use and management requirements. Each map unit is defined by a unique combination of soil components and/or miscellaneous areas in predictable proportions. Some components may be highly contrasting to the other components of the map unit. The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The delineation of such landforms and landform segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, onsite investigation is needed to define and locate the soils and miscellaneous areas.

Soil scientists make many field observations in the process of producing a soil map. The frequency of observation is dependent upon several factors, including scale of mapping, intensity of mapping, design of map units, complexity of the landscape, and experience of the soil scientist. Observations are made to test and refine the soil-landscape model and predictions and to verify the classification of the soils at specific locations. Once the soil-landscape model is refined, a significantly smaller number of measurements of individual soil properties are made and recorded. These measurements may include field measurements, such as those for color, depth to bedrock, and texture, and laboratory measurements, such as those for content of sand, silt, clay, salt, and other components. Properties of each soil typically vary from one point to another across the landscape.

Observations for map unit components are aggregated to develop ranges of characteristics for the components. The aggregated values are presented. Direct measurements do not exist for every property presented for every map unit component. Values for some properties are estimated from combinations of other properties.

While a soil survey is in progress, samples of some of the soils in the area generally are collected for laboratory analyses and for engineering tests. Soil scientists interpret the data from these analyses and tests as well as the field-observed characteristics and the soil properties to determine the expected behavior of the soils under different uses. Interpretations for all of the soils are field tested through observation of the soils in different uses and under different levels of management. Some interpretations are modified to fit local conditions, and some new interpretations are developed to meet local needs. Data are assembled from other sources, such as research information, production records, and field experience of specialists. For example, data on crop yields under defined levels of management are assembled from farm records and from field or plot experiments on the same kinds of soil.

Predictions about soil behavior are based not only on soil properties but also on such variables as climate and biological activity. Soil conditions are predictable over long periods of time, but they are not predictable from year to year. For example, soil scientists can predict with a fairly high degree of accuracy that a given soil will have a high water table within certain depths in most years, but they cannot predict that a high water table will always be at a specific level in the soil on a specific date.

After soil scientists located and identified the significant natural bodies of soil in the survey area, they drew the boundaries of these bodies on aerial photographs and

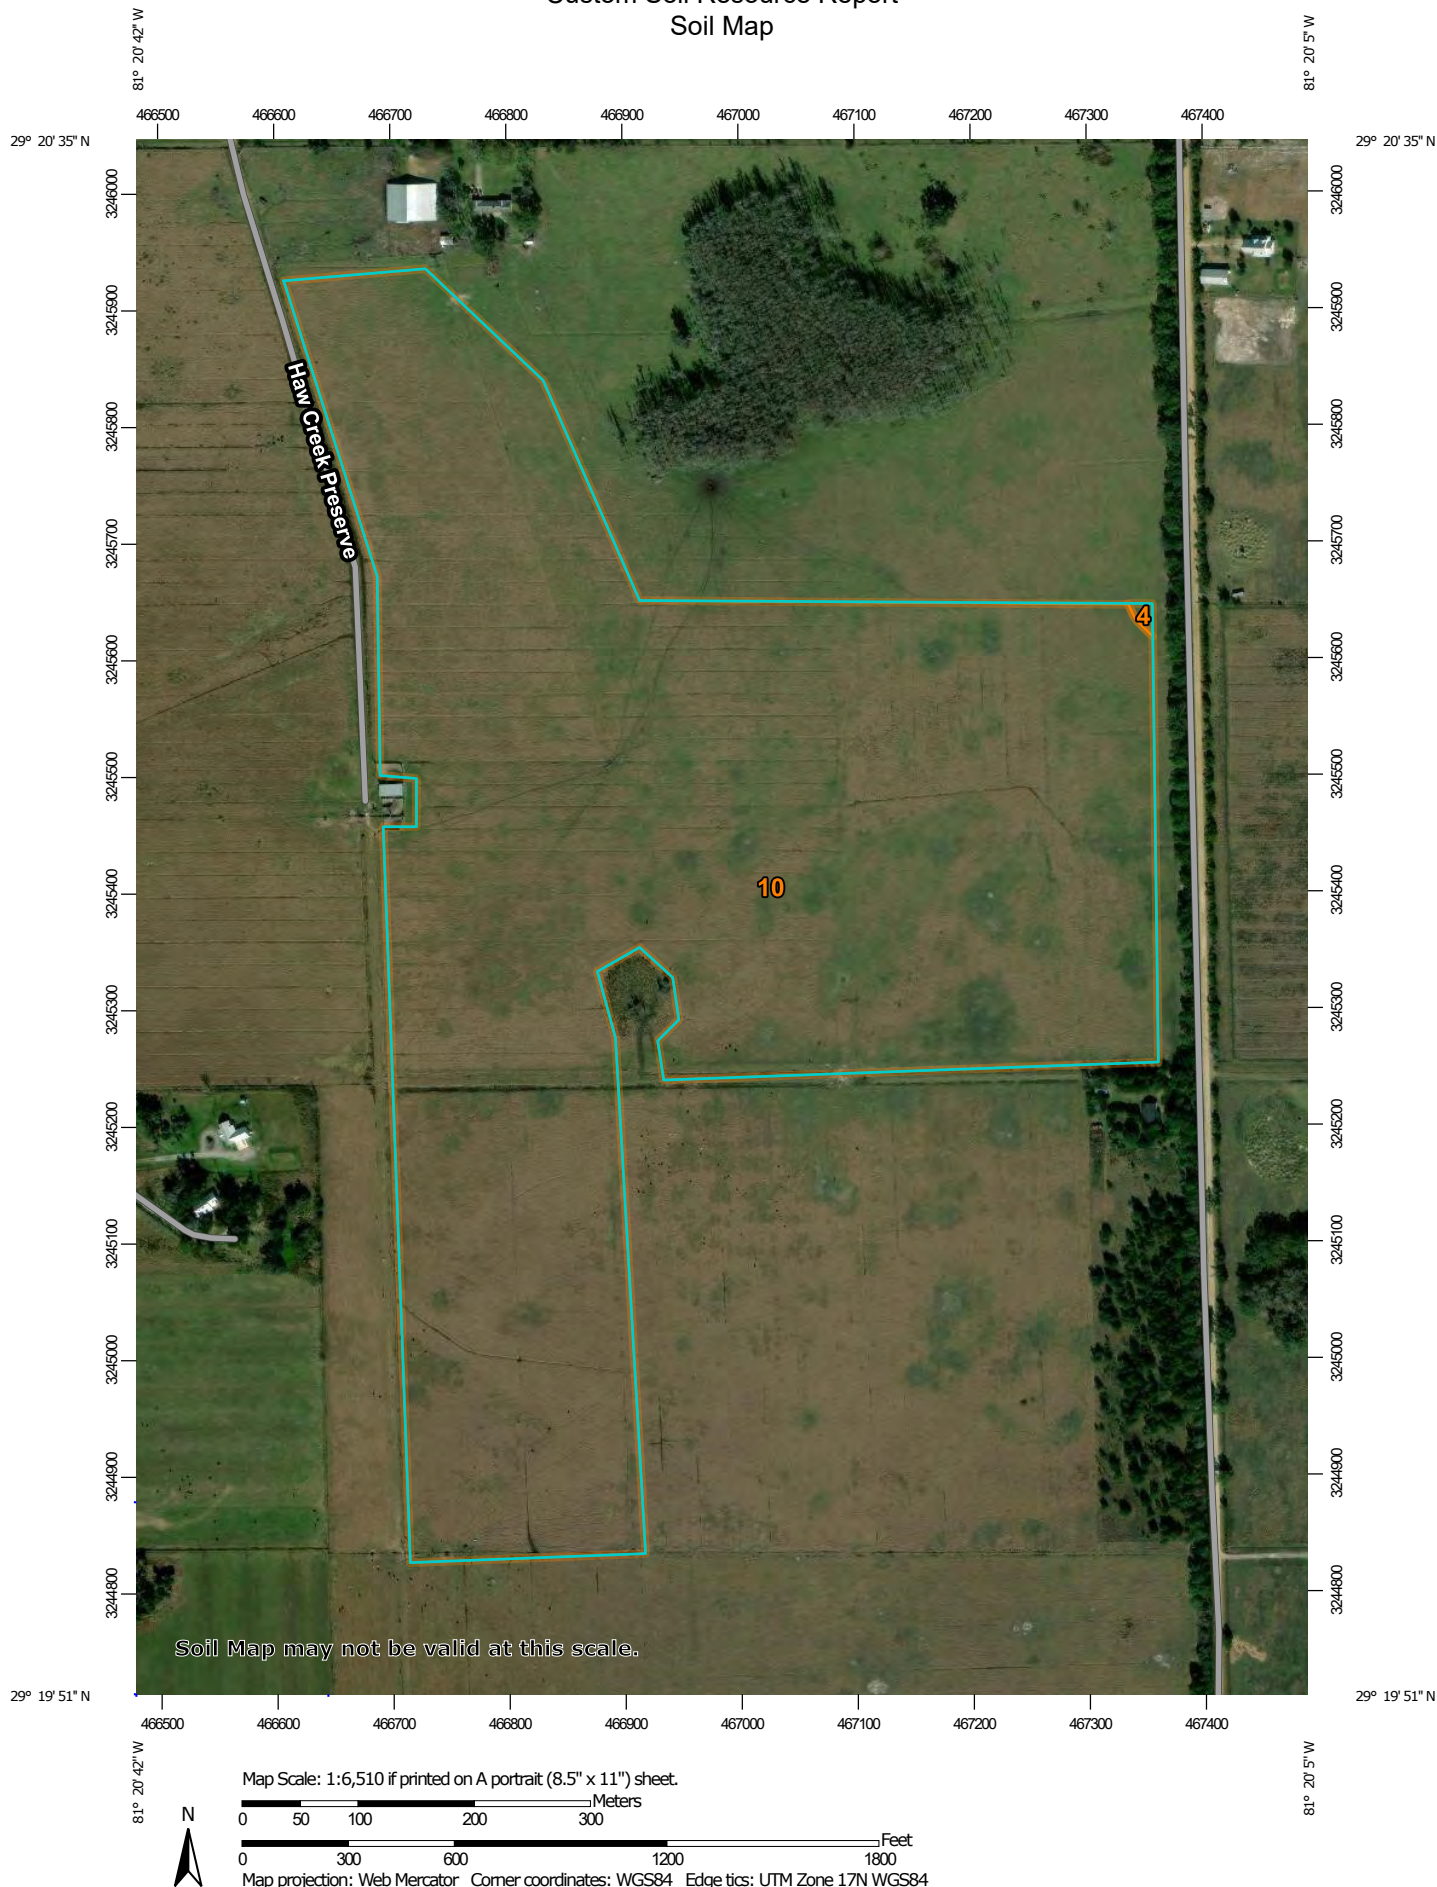

Custom Soil Resource Report

identified each as a specific map unit. Aerial photographs show trees, buildings, fields, roads, and rivers, all of which help in locating boundaries accurately.

Soil Map

The soil map section includes the soil map for the defined area of interest, a list of soil map units on the map and extent of each map unit, and cartographic symbols displayed on the map. Also presented are various metadata about data used to produce the map, and a description of each soil map unit.

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:15,800.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
Web Soil Survey URL:
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Flagler County, Florida
Survey Area Data: Version 16, Sep 12, 2018

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Dec 31, 2009—Nov 25, 2017

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

Map Unit Descriptions

The map units delineated on the detailed soil maps in a soil survey represent the soils or miscellaneous areas in the survey area. The map unit descriptions, along with the maps, can be used to determine the composition and properties of a unit.

A map unit delineation on a soil map represents an area dominated by one or more major kinds of soil or miscellaneous areas. A map unit is identified and named according to the taxonomic classification of the dominant soils. Within a taxonomic class there are precisely defined limits for the properties of the soils. On the landscape, however, the soils are natural phenomena, and they have the characteristic variability of all natural phenomena. Thus, the range of some observed properties may extend beyond the limits defined for a taxonomic class. Areas of soils of a single taxonomic class rarely, if ever, can be mapped without including areas of other taxonomic classes. Consequently, every map unit is made up of the soils or miscellaneous areas for which it is named and some minor components that belong to taxonomic classes other than those of the major soils.

Most minor soils have properties similar to those of the dominant soil or soils in the map unit, and thus they do not affect use and management. These are called noncontrasting, or similar, components. They may or may not be mentioned in a particular map unit description. Other minor components, however, have properties and behavioral characteristics divergent enough to affect use or to require different management. These are called contrasting, or dissimilar, components. They generally are in small areas and could not be mapped separately because of the scale used. Some small areas of strongly contrasting soils or miscellaneous areas are identified by a special symbol on the maps. If included in the database for a given area, the contrasting minor components are identified in the map unit descriptions along with some characteristics of each. A few areas of minor components may not have been observed, and consequently they are not mentioned in the descriptions, especially where the pattern was so complex that it was impractical to make enough observations to identify all the soils and miscellaneous areas on the landscape.

The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The objective of mapping is not to delineate pure taxonomic classes but rather to separate the landscape into landforms or landform segments that have similar use and management requirements. The delineation of such segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, however,

Custom Soil Resource Report

onsite investigation is needed to define and locate the soils and miscellaneous areas.

An identifying symbol precedes the map unit name in the map unit descriptions. Each description includes general facts about the unit and gives important soil properties and qualities.

Soils that have profiles that are almost alike make up a *soil series*. Except for differences in texture of the surface layer, all the soils of a series have major horizons that are similar in composition, thickness, and arrangement.

Soils of one series can differ in texture of the surface layer, slope, stoniness, salinity, degree of erosion, and other characteristics that affect their use. On the basis of such differences, a soil series is divided into *soil phases*. Most of the areas shown on the detailed soil maps are phases of soil series. The name of a soil phase commonly indicates a feature that affects use or management. For example, Alpha silt loam, 0 to 2 percent slopes, is a phase of the Alpha series.

Some map units are made up of two or more major soils or miscellaneous areas. These map units are complexes, associations, or undifferentiated groups.

A *complex* consists of two or more soils or miscellaneous areas in such an intricate pattern or in such small areas that they cannot be shown separately on the maps. The pattern and proportion of the soils or miscellaneous areas are somewhat similar in all areas. Alpha-Beta complex, 0 to 6 percent slopes, is an example.

An *association* is made up of two or more geographically associated soils or miscellaneous areas that are shown as one unit on the maps. Because of present or anticipated uses of the map units in the survey area, it was not considered practical or necessary to map the soils or miscellaneous areas separately. The pattern and relative proportion of the soils or miscellaneous areas are somewhat similar. Alpha-Beta association, 0 to 2 percent slopes, is an example.

An *undifferentiated group* is made up of two or more soils or miscellaneous areas that could be mapped individually but are mapped as one unit because similar interpretations can be made for use and management. The pattern and proportion of the soils or miscellaneous areas in a mapped area are not uniform. An area can be made up of only one of the major soils or miscellaneous areas, or it can be made up of all of them. Alpha and Beta soils, 0 to 2 percent slopes, is an example.

Some surveys include *miscellaneous areas*. Such areas have little or no soil material and support little or no vegetation. Rock outcrop is an example.

Custom Soil Resource Report

Flagler County, Florida

4—Wabasso fine sand, 0 to 2 percent slopes

Map Unit Setting

National map unit symbol: 2svzg
Elevation: 0 to 130 feet
Mean annual precipitation: 38 to 64 inches
Mean annual air temperature: 68 to 77 degrees F
Frost-free period: 350 to 365 days
Farmland classification: Farmland of unique importance

Map Unit Composition

Wabasso and similar soils: 85 percent
Minor components: 15 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Wabasso

Setting

Landform: Flatwoods on marine terraces
Landform position (three-dimensional): Tread, talf
Down-slope shape: Convex, linear
Across-slope shape: Linear
Parent material: Sandy and loamy marine deposits

Typical profile

A - 0 to 4 inches: fine sand
E - 4 to 16 inches: fine sand
Bh - 16 to 28 inches: fine sand
E' - 28 to 32 inches: fine sand
Btg - 32 to 48 inches: fine sandy loam
Ckg - 48 to 80 inches: loamy fine sand

Properties and qualities

Slope: 0 to 2 percent
Depth to restrictive feature: More than 80 inches
Natural drainage class: Poorly drained
Runoff class: Very high
Capacity of the most limiting layer to transmit water (Ksat): High (2.00 to 6.00 in/hr)
Depth to water table: About 6 to 18 inches
Frequency of flooding: None
Frequency of ponding: None
Calcium carbonate, maximum in profile: 5 percent
Salinity, maximum in profile: Nonsaline to very slightly saline (0.0 to 2.0 mmhos/cm)
Sodium adsorption ratio, maximum in profile: 4.0
Available water storage in profile: Moderate (about 7.1 inches)

Interpretive groups

Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 3w
Hydrologic Soil Group: A/D

Land capability classification (irrigated): None specified

Land capability classification (nonirrigated): 3w

Hydrologic Soil Group: C/D

Forage suitability group: Loamy and clayey soils on flats of hydric or mesic lowlands (G155XB341FL)

Other vegetative classification: Cabbage Palm Flatwoods (R155XY005FL), Wetland Hardwood Hammock (R155XY012FL), Slough (R155XY011FL)

Hydric soil rating: Yes

Minor Components**Malabar**

Percent of map unit: 4 percent

Landform: — error in exists on —

Landform position (three-dimensional): Tread, dip, talf

Down-slope shape: Linear, concave

Across-slope shape: Linear, concave

Ecological site: Slough (R155XY011FL)

Other vegetative classification: Slough (R155XY011FL)

Hydric soil rating: Yes

Basinger

Percent of map unit: 4 percent

Landform: — error in exists on —

Landform position (three-dimensional): Tread, dip, talf

Down-slope shape: Concave, linear

Across-slope shape: Concave, linear

Other vegetative classification: Slough (R155XY011FL)

Hydric soil rating: Yes

Wabasso

Percent of map unit: 4 percent

Landform: Flatwoods on marine terraces

Landform position (three-dimensional): Tread, talf

Down-slope shape: Linear, convex

Across-slope shape: Linear

Other vegetative classification: South Florida Flatwoods (R155XY003FL)

Hydric soil rating: No

Holopaw

Percent of map unit: 3 percent

Landform: Flats on marine terraces, drainageways on marine terraces

Landform position (three-dimensional): Tread, talf, dip

Down-slope shape: Linear, convex

Across-slope shape: Linear, concave

Other vegetative classification: Slough (R155XY011FL)

Hydric soil rating: Yes

For Office Use Only			
<p align="center">MANDATORY DIVISION REVIEW</p> <p align="center">eAdjuster Automatically Flagged this Claim for Mandatory Division Review for the following reasons: The added land question for FLAGLER county needs reviewed. No other producers in area were prevented from planting. All Spring Acres not available.</p>			

Determined Acres

Unit No. (Crop/County)	Yield ID	Line ID	Determined Acres
3.07 OU (PTATO/FLAGLER)	20.0	1.0 - PP	100.0
TOTAL:			100.0

Loss Credit Agreement

In addition to any premium and/or administrative fees for all crop(s)/county(ies) in which the billing date has passed and for the crop/county(ies) with the loss, I agree to have my total premium and/or administrative fees for all of my crop(s)/county(ies) insured under this policy or any other policy authorized under the ACT deducted from the indemnity or prevented planted loss due me under this claim. If the billing date has passed for any crop(s)/county(ies) at the time the loss payment is processed, any amounts due for those crop(s)/county(ies) will be deducted, regardless of how you answered this question.

Yes ☒ No ☐

Summary Questions

Is any acreage of the damage crops considered a second crop following a first insured crop which was planted and incurred an indemnity within the same crop year?

no

Is any acreage of the damage crops considered a second crop following a first insured crop which was prevented from being planted within the same crop year?

no

Were there other producers in the general area that were prevented from planting?

no

Verifications

Policyholder verified Tax ID XXXXX3132 is correct.

Yes ☒ No ☐

Policyholder verified Entity Type Limited Liability Company is correct.

Yes ☒ No ☐

To Rain and Hail

List the crop years in which you have been actively engaged in farming this production.

Include farming as an SBI on another policy. Example: 2016, 2017, 2018

Answer: 2018

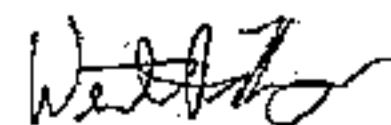

This line was flagged as New Practice/Type/Variety in 2019. Have you been actively engaged in farming a share of the production on this line (100 acres of POTATOES in FLAGLER county)?

Answer: yes

Have you been actively engaged in farming for a share of the production of any crop on the acreage designated as Added Land in FLAGLER county prior to the year in which the land was identified as added land on your policy (year added: 2019)?

Answer: yes

AGRI GENERAL INSURANCE COMPANY

INSURANCE COMPANY

Date 04/16/2019Name of Insured JULINGTON CREEK FARMSAddress PO BOX 600277 City JACKSONVILLE State FL 32260-0000Agency Name & Address PROGRESSIVE AG, 417 38TH ST SW STE A, FARGO, ND 58103-6508To Claims manager

Insured stated that wet weather throughout the growing season caused him to not be able to plant his potatoes on approximately 100 acres. Field visit after the final plant date showed ground that was still wet with muddy spots throughout.

Included is a letter from a sod farm next to this location stating they were not able to cut any sod during this time.

Insured stated that they will be planting a cover crop of Sudan grass on the PP acres.

Supporting documents have been uploaded.

Claim is being signed on a non-waiver as this was the only PP claim in the area.

I certify that to the best of my knowledge and belief all of the information on this form is correct and complete and that it will be used to determine my loss, if any, for damage to my insured crops. I understand that this Production Worksheet/Proof of Loss and supporting papers are subject to audit and approval by us. I understand that this crop insurance is subsidized and reinsured by the Federal Crop Insurance Corporation, an agency of the United States Department of Agriculture (USDA). I accept the Agreed Amount Payable, subject to policy provisions, for damage to my insured crops. I hereby certify that the acreage reports for each insured crop that I submitted are true and correct and that all documents or copies of documents that I have submitted in support of my insurance claim are true, correct and complete. I hereby authorize you to inspect any and all scale tickets, warehouse receipts, inventory records and any other documents that pertain to the crop I have harvested and marketed or that I now have in my possession wherever located. I also hereby expressly authorize you to inspect and copy any and all records of the Farm Service Agency of the USDA, consent to the release of the records that pertain to my farming operation, my production history, and my compliance with program requirements. I also understand that failure to report completely and accurately may result in sanctions under my policy, including but not limited to voidance of the policy, and in criminal or civil penalties (18 U.S.C. §1006 and §1014; 7 U.S.C. §1506; 31 U.S.C. §3729, §3730 and any other applicable federal statutes).												67. PREVENTED PLANTED FIRST INSURED CROP DECLARATION FORM

Insured Name JULINGTON CREEK FARMS					Policy Number MP-0749812 AGRI GENERAL INSURANC...		
Claim Number 19-003688					Crop Year 2019		
					County FLAGLER		
Unit Number (First Crop)	Line Number	Yield Number	Legal Description/FSN	First Insured Crop	Intended Second Crop	Option Number	Acres
3.07 OU	1.0	20	389	PTATO (0084)	N/A	1 (NS)	100.0

Enter the applicable option number(s) in the above table (First Crop Prevented Planted Acreage):

1. I certify that I will **not plant a second crop** on the prevented planted acreage. The prevented planted first crop premium and indemnity will be reduced by 65% if a second crop is planted (by you or another person or entity) on the prevented planted first crop acreage. You will also be responsible for notifying us if a second crop is planted, or if you receive cash rent for any of the prevented planted first crop acreage, and repaying any overpayment on the first insured crop. **(Code NS)**
2. I certify that I **will plant a second crop** or will receive a cash rent payment on the prevented planted acreage. I also certify that the second crop will not be planted, or a volunteer crop or cover crop hayed, grazed or otherwise harvested, on or before the end of the late planting period for the prevented planted first crop, or the final planting date if no late planting period is applicable. **(Code RP)**
3. I certify that I **will plant a second crop** on the prevented planted acreage. I also certify that the second crop will not be planted, or a volunteer crop or cover crop hayed, grazed or otherwise harvested, on or before the end of the late planting period for the prevented planted first crop, or the final planting date if no late planting period is applicable. I have, and am submitting, acceptable records to show that I have **double cropped acreage in at least two of the last four crop years** in which the insured crop that is prevented from being planted in the current crop year was grown in the county or can show that the applicable acreage was double cropped in at least two of the last four crop years in which the insured crop was grown on it. I also agree that if I have planted more double cropped acres than can be supported by my records, the extra acres will be handled in accordance with option number two above. **(Code DC)**

A second crop is defined as the next occurrence of planting any agricultural commodity for harvest following a first insured crop on the same acreage. A cover crop, planted after a first insured crop and planted for the purpose of haying grazing or otherwise harvesting in any manner, or that is hayed or grazed prior to November 1 of the current crop year, or otherwise harvested at any time, is considered a second crop. It is not considered a second crop if a volunteer crop or cover crop is not intended to be hayed, grazed or otherwise harvested (i.e. green manure, erosion control etc.), or is hayed or grazed on or after November 1 of the current crop year.

I certify that to the best of my knowledge and belief all of the information on this form is correct. I also understand that failure to report completely and accurately may result in sanctions under my policy, including but not limited to voidance of the policy, and in criminal or civil penalties (18 U.S.C. §1006 and §1014; 7 U.S.C. §1506; 31 U.S.C. §3729, §3730 and any other applicable federal statutes).

COLLECTION OF INFORMATION AND DATA (PRIVACY ACT) STATEMENT

Agents, Loss Adjusters and Policyholders

The following statements are made in accordance with the Privacy Act of 1974 (5 U.S.C. 552a): The Risk Management Agency (RMA) is authorized by the Federal Crop Insurance Act (7 U.S.C. 1501-1524) or other Acts, and the regulations promulgated thereunder, to solicit the information requested on documents established by RMA or by approved insurance providers (AIPs) that have been approved by the Federal Crop Insurance Corporation (FCIC) to deliver Federal crop insurance. The information is necessary for AIPs and RMA to operate the Federal crop insurance program, determine program eligibility, conduct statistical analysis, and ensure program integrity. Information provided herein may be furnished to other Federal, State, or local agencies, as required or permitted by law, law enforcement agencies, courts or adjudicative bodies, foreign agencies, magistrate, administrative tribunal, AIPs contractors and cooperators, Comprehensive Information Management System (CIMS), congressional offices, or entities under contract with RMA. For insurance agents, certain information may also be disclosed to the public to assist interested individuals in locating agents in a particular area. Disclosure of the information requested is voluntary. However, failure to correctly report the requested information may result in the rejection of this document by the AIP or RMA in accordance with the Standard Reinsurance Agreement between the AIP and FCIC, Federal regulations, or RMA-approved procedures and the denial of program eligibility or benefits derived therefrom. Also, failure to provide true and correct information may result in civil suit or criminal prosecution and the assessment of penalties or pursuit of other remedies.

NONDISCRIMINATION STATEMENT

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or a part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD).

To file a complaint of discrimination, write to: USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410, or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.
